

## **Capability Statement for Agencies**

**Building custom software to save time, simplify workflow, and make data interpretation easier.**

Features can include:

- Automate requests, approvals, reminders, and follow-ups.
- Find information across spreadsheets, email, and files.
- Connect applications, databases, and outside services.
- Organize data and establish an official record.
- See work status, overdue items, and exceptions.
- Our shared work board shows who is responsible, what's underway, and when work is planned.

## **Relevant experience**

### **Specialty metals distributor: since 2009**

Purchasing and logistics software helps buyers decide when and how much to buy, track vendor orders, and plan trucks for supplier shipments and branch transfers.

### **Delivery operations client: since 2022**

Delivery operations software: Track contractor compliance, claims, documents, and electronic signatures.
